Yogyakarta
2007

Penelitian ini bertujuan untuk mengetahui: (1) hubungan negatif antara persepsi orang tua murid kelas 6 SD terhadap BOS dengan minat orang tua untuk menyekolahkan anaknya ke SLTP ditinjau dari tingkat pendidikan orang tua; (2) hubungan negatif antara persepsi orang tua murid kelas 6 SD terhadap BOS dengan minat orang tua untuk menyekolahkan anaknya ke SLTP ditinjau dari tingkat pendapatan orang tua.

Penelitian dilaksanakan di 10 SD Negeri yang ada di Kecamatan Patuk, Gunungkidul. Populasi penelitian ini sebanyak 454 responden. Jumlah sampel penelitian sebanyak 199 responden. Teknik pengambilan sampel adalah *proporsional random sampling*. Teknik pengumpulan data menggunakan metode kuesioner tertutup. Teknik analisis data menggunakan regresi yang telah dikembangkan oleh Chow.

Hasil penelitian menunjukkan bahwa: (1) ada hubungan negatif persepsi orang tua murid kelas 6 SD terhadap BOS dengan minat orang tua untuk menyekolahkan anaknya ke SLTP ditinjau dari tingkat pendidikan ($r = 0,001 < \alpha = 0,050$); (2) ada hubungan negatif persepsi orang tua murid kelas 6 SD terhadap BOS dengan minat orang tua untuk menyekolahkan anaknya ke SLTP ditinjau dari tingkat pendapatan ($r = 0,002 < \alpha = 0,050$).

ABSTRACT

THE CORRELATION BETWEEN THE SIXTH GRADE ELEMENTARY SCHOOL STUDENTS' PARENTS' PERCEPTION TOWARDS *BOS* AND THE PARENTS' INTEREST TO SEND THEIR CHILDREN TO JUNIOR HIGH SCHOOL AS SEEN FROM THE PARENTS' LEVEL OF EDUCATION AND INCOME

A survey on the parents of the sixth grade elementary school students in Patuk subdistrict, Gunungkidul

2007

The purposes of this research were to find out: (1) a negative correlation between the sixth grade elementary school students' parents' perception towards BOS and the parents' interest to send their children to Junior High School as seen from the parents' level of education; (2) a negative correlation between the sixth elementary school students' parents' perception towards BOS and the parents' interest to send their children to Junior High School as seen from the parents' income.

The research was done in ten elementary Schools located in Patuk subdistrict, Gunungkidul. There were 199 respondents who did the research from the total population which were 454 respondents. The Proportional Random Sampling technique was used to take the sample. The writer used closed-questionnaire method to collect the data and regression formula modified by Chow to analyze the data.

The result of this research showed that: (1) there was a negative correlation between the sixth grade elementary school students' parents' perception towards BOS and the parents' interest to send their children to Junior High School seen from the parents' level of education ($r = 0.001$, $\alpha = 0.050$); (2) there was a negative correlation between the sixth elementary school students' parents' perception towards BOS and the parents' interest to send their children to Junior High School seen from the parents' income ($r = 0.002$, $\alpha = 0.050$).
